

# Homework 8: 1. Finish Data Linkage Lab.

follow the instructions given to you in class

## Homework 8: 2. Peer review of 2 classmate's plots

two classmates will be assigned to you at random. Follow the instruction in the email you will receive and review their plots according to the guidelines learned in the Viz lecture.

[https://github.com/fedhere/UInotebooks/blob/master/slides/UI7\\_PUI2016.pdf](https://github.com/fedhere/UInotebooks/blob/master/slides/UI7_PUI2016.pdf)  
and the references therein.

Obtain the plot by forking your classmate repository. Also download the plot.

Upload your reviews BOTH

- 1) by uploading your classmate's plot in your own PUI2016 repo HW8 folder and writing your review in a Markdown comment named  
Review\_<yourclassmatenetid>\_<yournedit>.md
- 2) by uploading your review markdown (the same in you upload in your HW8 folder) to your classmate's HW7 via pull request of your fork  
(the methods of delivery will be graded as well so do comply to these guidelines.)
